

Occupational Health Services

Occupational Health Services: SCATS occupational health services ensure your employees are protected while performing hazardous processes or using equipment that may release toxic substances. Our industrial hygienists can provide assistance with:

- Qualitative and Quantitative Exposure Assessments
- Compliance Evaluations
- Program Development
- Indoor Air Quality Evaluations

Qualitative and Quantitative Exposure Assessments: SCATS specialists visit the workplace and follow processes and procedures performed by employees while on the job. Then our specialists review safety and health procedures and policies in place. Our staff will also perform surveillance for airborne contaminants, chemical and noise exposures that may include:

- Reviewing existing exposure data
- Identifying potential hazards
- Measuring and evaluating exposures
- Interpreting data and assessing risks
- Providing timely on-site service
- Provide guidance and assistance for continuing or periodic exposure monitoring programs

Compliance Evaluations: Compliance evaluations are an important part of health and safety on the job and a major way in which SCATS can help

businesses develop and implement required programs. SCATS can assist in auditing and evaluating programs that fulfill Nevada OSHA regulatory requirements.

Program Development: SCATS can assist businesses with cost-effective program development through recommendations based on results of on-site surveys and evaluations. As such, SCATS assists businesses through:

- Written reports and quantitative data documenting findings and recommendations
- Review, audit, and critique of existing programs
- Assist with development and implementation of occupational health programs
- Provide guidance implementing effective administrative and engineering control measures
- Evaluate and specify appropriate personal protective equipment
- Examine and assess adequacy of established occupational health control programs
- Keep employers up to date with current regulatory information
- Provide direction, evaluation, and support of existing in-house program resources

Indoor Air Quality Evaluations: Our occupational health specialists can assist Nevada businesses with indoor air quality problems. We will help you define the situation to develop an action plan and determine the most cost-effective, practical and quick way to resolve it.
